

Barebones orders in PCB Artist™

Ordering Barebones orders in PCB Artist™ requires the customer to order through the PCB Artist™ software. First make sure your board design is in "Basic Spec". Go to Settings > PCB Configuration to check.

The PCB Configuration is also where one can set up the board order. Make sure your order matches the Barebones order specs found here: <https://www.4pcb.com/pcb-prototype-2-4-layer-boards-specials.html>

Keep in mind that one cannot turn off some aspects of a basic spec order for a barebones board. This will be adjusted on the order page automatically.

Click Finish on the production section to save the changes in the PCB Configuration.

To order, click the Order Now link at the top of the software:

A gray box will pop to fill out. Ignore the pricing here as the promotion has not been applied yet.

Put in your log in information for Advanced Circuits (4pcb.com).

In the Promotion Code section put Barebones.

A screenshot of the 'Submit Order' dialog box. It contains a 'READ THIS FIRST' section with instructions. The 'Total Cost' is displayed as '\$330.01'. There are buttons for 'How To Place Your Order...', 'Email A Question...', and 'PCB Configuration Report...'. The 'Promotion Code' field is filled with 'Barebones'. The 'Advanced Circuits Account User Email' field contains 'Customer e-mail' and the 'Advanced Circuits Password' field contains '*****'. At the bottom are buttons for 'Place Order...', 'Get Quote...', 'Close', and 'Cancel'.

Click place order.

If there are no errors you will reach an upload page. Click the choose file button and navigate to your (filename) .pcb or newly created .fab file.

Once the file is selected, click the blue Upload button.

From here you'll be in the normal ordering system for Advanced Circuits. Fill out payment, shipping and ITAR information and proceed forward with the order.
